when placing orders

BlueCart allows for  
more time to focus on  
employee training.

# 80%

increase in supply  
chain satisfaction

Industry: Restaurant (Gourmet Sandwiches)

Location: Champaign, IL

Joined BlueCart: November 2015

Before BlueCart it was very difficult to monitor ordering at all three locations. Now with BlueCart, Jimmy John's knows exactly what their stores are ordering and when they order. This gives Ben, Owner and Operator at Jimmy John's, a peace of mind because they know they will not run out of product.

**“BlueCart is great because it allows me to monitor and place orders from all three of my franchise locations. I get email notifications every time an order is placed by one of my managers and can quickly check my BlueCart account to view order histories. The ability to remotely monitor and manage ordering allows me to support my managers, making their jobs much easier. This is a mobile solution that definitely improves my life as a multi-unit franchisee!”**

Ben Stoltzfoos • Owner/Operator @ Jimmy Johns

BlueCart helps Jimmy John's to streamline their operations and decrease the likelihood of errors. Managers get more help from Owner and Operator Ben, and they don't need to worry about order errors since they know Ben is monitoring orders for their store. BlueCart gives Ben more time to find and train new managers.

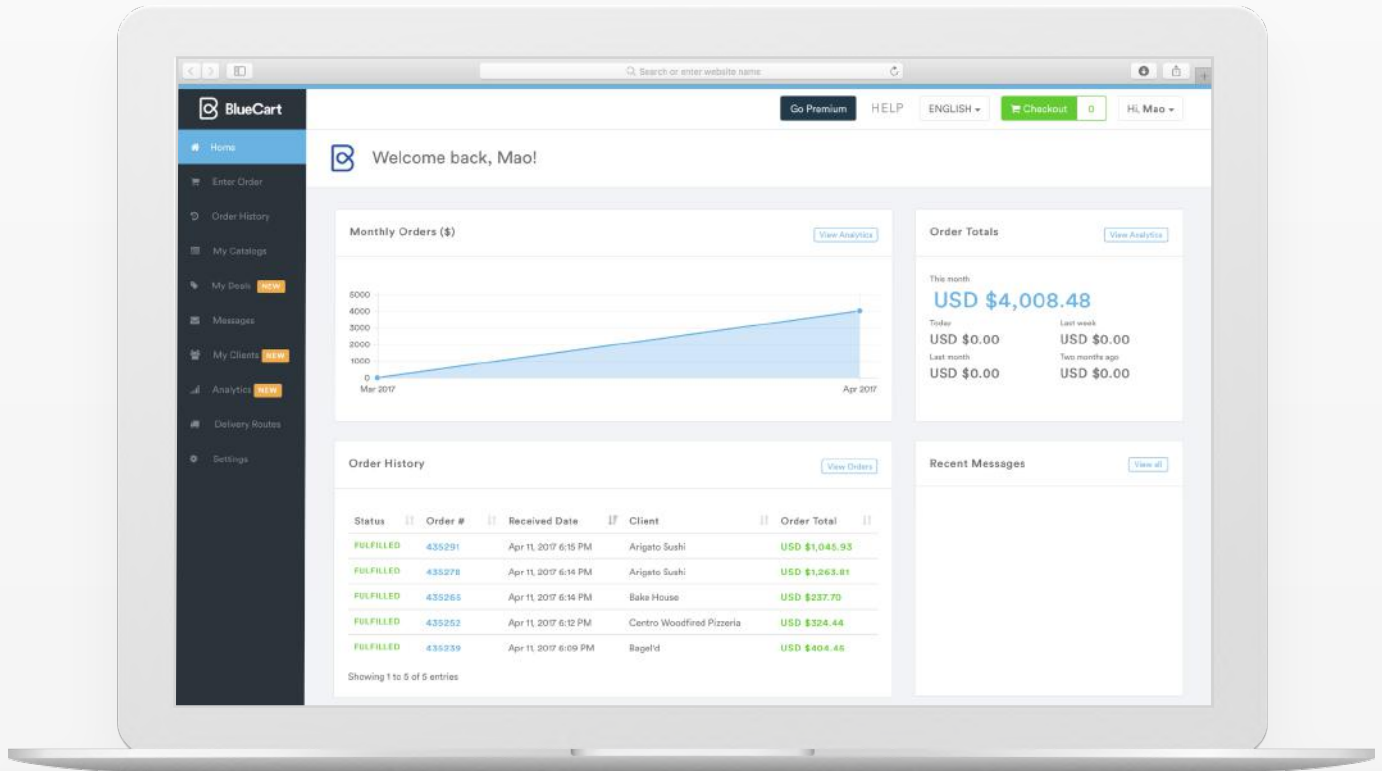

Training and developing managers is one of the biggest challenges Ben faces as an owner of fast casual restaurants. So it is a big deal anytime he finds a tool to make his job easier, more streamlined, and error-proof for his managers. Since using BlueCart, Ben has been able to lower labor costs and increase employee satisfaction.

# Restaurant Wholesale Ordering Made Simple.

Instant streamlined ordering done wherever you are.
